Mappi

Beyond Glass Perfection

Description: MAPPI INTERNATIONAL, ALWAYS AT THE FOREFRONT OF INNOVATION

Since 1993, Mappi International has been designing and manufacturing high quality tempering systems for the glass industry. More than 400 plants installed all over the world represent the company's stages of steady growth, important investments in research and development, uncompromising quality, and great attention to the specific needs of each and every customer. Mappi America, located in Florida, enables the customer service department to reach each and every plant within 24 hours.

Nancy Mammaro, CEO of Mappi says: "Our payoff, beyond glass perfection, sums up in three words our everyday aim shared at every level and in every area in Mappi. For all of us to go beyond glass perfection means to take a unique material like glass and commit ourselves to make it even better because we know that glass is an unforgiving material, it clearly shows its excellence and its flaws." Mappi International utilizes in-house production for each and every product. This enables the company to have complete quality control over each component, guaranteeing the highest quality performance and functionality of its machines – constantly.

This constant quality is found both in the design and in the range of products, where machines are different in size, technical solutions, mechanical engineering, and software solutions. User-friendly machines that have been designed to minimize downtime during shutdown and subsequent restart, along with the constant perfection of glass, and vast energy savings show just how Mappi produces tempering furnaces that go beyond perfection day after day.

All over the years Mappi has never changed its aim: to become the leader in tempering furnaces and manufacturing, and to constantly increase quality and customization to satisfy the specific needs of each customer.
