Glass Open Book

Vertech'

Drive the future

Description: Since 1995, Vertech' has been the reference provider of software solutions for the glass industry. With a wide range of products, SIL provides manufacturers with very precise, real-time KPIs on the performance of the whole plant. Thanks to all this shared data and the full traceability of products, production rates improve, losses decrease and customer risks are reduced.

SIL is a supervision system (Manufacturing Execution System, M.E.S.) that can be installed from the batch to the palletizer, through the mold shop and quality labs.

SIL has been currently developed for glassmakers producing hollowware, tableware and tubes or decorating glass.
