Glass Lamination Autoclaves

Description:

We, Akar Makina, based in Turkey, offer glass lamination autoclaves for the glass industry to produce laminated flat (architectural) glass, bullet resistance glass and auto glass. Our autoclaves include vacuum system, glass loading transfer/autoclave cars, the cooling system as optional features, and we offer autoclaves up to jumbo size glass lamination.

Our autoclaves meet with international quality standards with European standards, and we work with internationally well-known certification agencies such as Bureau Veritas, TUV, Lloyd, Hartford Steam Boilers to certify our autoclaves. With our autoclaves, we are able to offer the following certifications and standards:

- Pressured Equipment Directive 97/23/EC (PED) (Europe)
- ASME SEC VII D.1. (North America)
- GOST-R (Russia)
- EN 3834-2
- Any other certificates that may be required by other authorities
