

Glass Open Book

CGC Capital-Gain Consultants GmbH

Description:	<p>Do you operate a glass furnace?</p> <p>How do you reduce CO2 emissions from the carbonate reactions and from the fossil-based firing in the furnace?</p> <p>You might have evaluated your options for alternative firing. But the substitution of carbonates may not be an option.</p> <p>Our solution: Convert the CO2 to Soda Ash.</p> <p>Contact us for a feasibility study!</p>
Location:	Germany
Sectors:	Glass container, Flat / Float glass
