

# Glass Open Book

## PSI Ltd

Integrated solutions for the glass industry

- Description:
1. Integrated design of glass container production lines:
    - Design of glass furnaces and feeders
    - Production lines' configuration development (glass-forming machines, annealing furnaces, conveyors, inspection and packaging equipment)
    - Engineering communication schemes
  2. Refractory materials for glass furnaces and feeders, furnace automation
  3. Supply, installation, supervision and commissioning of IS-machines with a Russian interface
  4. Inspection equipment, including installation supervision and staff training
  5. Full range of cold section equipment:
    - Conveyor Lines
    - Palletizers
    - Sliding machines
    - Shrink packaging machines
    - Shuttles and pallet transfer systems
  6. Related technological equipment:
    - Ware transfers and stackers
    - Equipment for Quality control department (pressure testers, compression testers, etc.)
    - Automatic washing lines for pallet gaskets
    - Control system for glass-forming machines
  7. Mold kits for glass container manufacture of any complexity
  8. Spare parts for all types of equipment

Location: [Russian Federation](#)

Sectors: [Glass container](#)

Activities: [Equipment / Machinery supplier](#)
